

## LOCAL PROGRAM PLANNING RECOMMENDATIONS

1. **A public forum on the security of our elections.** *This is in response to the concerns about the validity and security of the November 2020 election.*
2. **Review/update on the transportation position.** *The LWV-CC position was a concurrence from LWV-Dallas on the DART (Dallas Area Rapid Transit) and is not as relevant to Collin County nor does it cover all current transportation issues.*
3. **A public forum on transportation.** *This would only require LWV-CC to hold a public forum on transportation. The agenda and speakers have already been developed but had to be postponed in 2020. This would not require an update on the transportation position.*

## LOCAL PROGRAM PLANNING SUBMISSIONS THAT WERE NOT ADOPTED

1. **A public forum on the women's health and maternal mortality.** Texas has one of the most concerning maternal mortality rates in the country, particularly for women of color.
2. **A public forum on criminal justice reform, including police training and the current laws and procedures and the effect on citizens.** Research state immunity laws for law enforcement personnel; judgements rendered that disproportionately impact people of color; bonding system that penalizes poor, non-violent offenders with imprisonments.
3. **A study on conscientious objection to vaccines by parents of school-age children in Collin County.** The scope would cover (but not limited to): how many children in Collin County public schools are enrolled per year whose parents have used this claim; if there are any consequences to this for the school and other students, including the spread of disease in the schools; how Collin County compares to other areas of the state in relation to this issue.
